

**FirstPower Group LLC offers three day Worthington V2A4 Maintenance Training Class
Learn Best Practices from FirstPower Group LLC's technicians**

February 4, 2010-Twinsburg, OH--[FirstPower Group LLC](http://www.firstpowergroupllc.com) has announced their most recent training offering for the Electric Power Industry. The course, to be held April 6-8, 2010 will be led by FirstPower Group LLC's own highly experienced and skilled team of Engineers and Technicians; with lengthy experience maintaining, servicing & re-manufacturing air compressors used in high voltage circuit breaker mechanism since 1979.

Complete course details and registration are available here: <http://www.firstpowergroupllc.com/FPG%20-%20FirstPower%20Group%20LLC%20-%20Training%20Programs.htm>

The class will prepare new technicians and is a great refresher for supervisors and experienced technicians alike. The course is designed for technicians and supervisors who are responsible for the maintenance and testing of circuit breaker compressors 2000 PSI and above. Requires minimal working knowledge of compressors; field experience beneficial but not necessary. Curriculum will include: Identification of major components, flow diagram, wiring diagram, maintenance details, operational and performance tests, replacement parts, systems trouble-shooting and comprehensive course test. Working air packages will be provided for hands-on demonstration and experience with performance testing, unit evaluation and trouble-shooting and 1500 hour maintenance inspection.

Attendance is limited to 10 individuals per class. Registration must be received no later than March 26, 2010.

The course will be held at FirstPower Group LLC's offices & manufacturing facility at 8941 Dutton Drive, Twinsburg, OH 44087. Class registration & course fee required for participation. Please download the registration form from FirstPower Group LLC's website <http://www.firstpowergroupllc.com/FPG%20-%20FirstPower%20Group%20LLC%20-%20Training%20Programs.htm>. Identify your candidates and get your registration returned quickly! Space is limited and class is filling quickly. FirstPower Group LLC has roots to a proud history of service and affordable, effective solutions to common electric power industry equipment problems. Established in 1979 by Jack Harley and originally known as J.W. Harley Inc., the company fulfilled Jack's vision of providing the electric power industry with superior substation products and upgrade services. In 1999, J.W. Harley Inc. became part of the General Electric Company; known as the GE Harley Service Center it was part of GE Energy Services. In 2007, industry veterans Jack Harley and Frank Ricard, Manager of Engineering & Quality for GE Harley Service Center, took ownership of the compressor and circuit breaker segments of the business and FirstPower Group LLC was born.

FirstPower Group LLC is applying years of experience working with compressors and high voltage circuit breakers and first-hand observation of the common causes of equipment failure, to produce cost saving solutions to common problems with the operation of high voltage circuit breakers and associated components. FirstPower Group LLC is a Distributor of Becker and Kaeser compressors and manufacturer of the CircuitAir 210 compressor.
